Toronto, ON | 647-629-0540 | maryamyatoure@gmail.com | linkedin.com/in/maryam-ya-toure | github.com/mya-tech

SUMMARY

Full-stack developer and Computer Programming & Analysis student (GPA 3.9) with production experience in cloud-native microservices, React/Next.js frontends, and ServiceNow enterprise platforms. Proven ability to deliver across co-op, research, and hackathon environments. Passionate about AI-integrated systems, scalable architecture, and tools with real-world impact.

EDUCATION

Computer Programming and Analysis — Advanced Diploma Feb 2024 – Feb 2026
Seneca Polytechnic | GPA: 3.9 *Toronto, ON*
Coursework: Cloud Computing (AWS, Docker, EC2), AI Programming (LLMs, OpenRouter, prompt engineering), Web Frameworks (React, Next.js, Hono), Software Testing (Jest, Supertest), OOP (Java, C++), GUI Development (JavaFX, Scene Builder), Data Structures & Algorithms, Database Design (SQL, PostgreSQL)

EXPERIENCE

Junior Web Developer (Co-op) Sep 2025 – Apr 2026
Toronto District School Board (TDSB)

- Migrated intranet from a legacy .NET CMS to ServiceNow, rebuilding 50+ pages and reconfiguring user permission structures across the organization.
- Designed and developed custom ServiceNow widgets and UI components to modernize the employee self-service portal, improving staff experience across the organization.
- Diagnosed platform defects with cross-functional teams, reducing the open issue backlog by 30%, and translated stakeholder requirements into functional specs for iterative delivery.

Research Assistant — Frontend Developer Dec 2024 – Sep 2025
Seneca Polytechnic

- Led frontend development using React and Tailwind CSS, building accessible and responsive interfaces that shipped into active production use on the research project.
- Collaborated in agile sprints using Git/GitHub, contributing to peer code reviews and branching strategy; produced Figma wireframes translated into pixel-accurate React components on schedule.

Founder & CEO Nov 2022 – Mar 2025
Samyah For Skin

- Founded and scaled a DTC skincare brand from concept to market, managing product formulation, Shopify e-commerce, supplier negotiations, and fulfilment logistics end-to-end.
- Built and maintained the brand website; directed organic social media campaigns on Instagram and TikTok, growing the customer base to 1,000+ repeat buyers independently.

Junior Frontend Developer May 2023 – Aug 2023
Gemini Management Internationale Université

- Developed internal web application features using HTML, CSS, JavaScript, and React for university infrastructure, following full SDLC practices from requirements through deployment.
- Collaborated with senior developers to implement targeted UI improvements, reducing reported interface defects by 20% over the engagement period.

PROJECTS

TORCH — Voice-Controlled Urban Risk Management System | *Python, FastAPI, React, Next.js, DuckDB, NVIDIA NIM LLMs, TypeScript, deck.gl*

- Built at NVIDIA Spark Hack Toronto (Toronto Tech Week 2025, 200+ participants); engineered a real-time 3D command center visualizing city-wide risk hotspots on a live Toronto map with AI-powered voice commands.
- Integrated NVIDIA NIM LLM APIs for natural language AI planning; streamed live data via WebSockets with a FastAPI/DuckDB backend processing open Toronto city datasets in real time.

Samyah OS — Multi-Tenant SaaS ERP | *Next.js, TypeScript, PostgreSQL, Supabase, Tailwind CSS, PWA*

- Architected a multi-tenant SaaS ERP with PostgreSQL Row-Level Security, SSR auth, real-time inventory dashboards, and PWA offline support for cross-location supply chain operations.

Fragments Microservice — Cloud-Native REST API | *Node.js, Express.js, AWS (EC2, Cognito, S3), Docker, Jest, GitHub Actions*

- Built and containerized a secure Express.js microservice with JWT/Cognito auth and structured logging, deployed to AWS EC2 via Docker with 74+ Jest/Supertest integration tests and a full CI/CD pipeline.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C#, Java, C, C++, HTML5, CSS3, SQL
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, Framer Motion, JavaFX, .NET
Cloud & DevOps: AWS (EC2, S3, Cognito), Docker, Kubernetes, GitHub Actions, CI/CD, REST APIs, WebSockets
Databases & Tools: PostgreSQL, Supabase, MongoDB, DuckDB, Git, Figma, Jira, ServiceNow, Scrum/Agile
AI & Testing: NVIDIA NIM LLM APIs, GitHub Copilot, OpenRouter, LLMs, Jest, Supertest

ACHIEVEMENTS & EXTRACURRICULARS

- NVIDIA Spark Hack Toronto** (Toronto Tech Week 2025): Selected to build and present TORCH, a voice-controlled AI urban risk command center, among 200+ participants at OneEleven Toronto.
- Dean's Honour List:** Maintained a 3.9 GPA across all semesters at Seneca Polytechnic.
- Tech Entrepreneurship:** Founded Samyah For Skin at 19; independently managed product development, operations, and a full digital marketing stack, scaling to 1,000+ customers.
